

STEPHEN MULINGWA

Software Developer & Data Scientist

WebDevelopment·AI&AnalyticsPlatforms · Fleet & Telematics Systems

I build **production web apps, analytics platforms, and AI-powered tools** for Kenyan and international clients from Next.js operations systems and agri-marketplaces to full company websites and fleet-tracking dashboards. Every build is production-grade from day one: fast, secure, and made to run on real-world networks.

4+ FEATURED BUILDS	3 PRICING TIERS	KE + INT'L CLIENTS	1 POINT OF CONTACT
--	---------------------------------------	--	--

\$ ls -la projects/

Kiki's Mobile Wellness	Next.js PWA for appointments, sales, stock, staff and expense management.
AgroLink / Mkulima Sokoni	Kenya-first agri marketplace connecting farmers directly to buyers.
YodaAI	AI-powered retrospective assistant built for agile teams.
Company Website Builds	Full brochure and marketing sites for AI & data-driven businesses.

Project Complexity Tiers

Every engagement is scoped against one of three tiers, based on how much of the stack the project touches from a static site to a full custom business system. Every tier includes a free post-launch support window.

TIER 01

Basic Softwares & Websites

Static and brochure-style sites, portfolios, company profiles, event pages, and blogs built with Next.js / React and designed to look sharp on any device.

INCLUDES

Portfolio websites

Personal websites

Company profile websites

Event websites

Blogs

Contact forms

SAMPLE PROJECTS

> Company profile site

> Event landing page

> Personal portfolio

◆ Includes 2 weeks free service & maintenance after deployment

TIER 02

Dynamic & Database-Driven Applications

Applications with real functionality, authentication, database CRUD, admin dashboards, and integrations built for teams that need more than a brochure site.

INCLUDES

API integration

DB integration (Postgres/MySQL/Supabase/Firebase)

Auth & user accounts

Admin dashboards

Booking systems

Customer portals

CMS integration

Email notifications

File uploads

SAMPLE PROJECTS

> Hotel Booking Platform

> Vehicle Fleet Dashboard

> Inventory Management System

> HR Management Portal

> School Management System

> Employee Leave Management System

> CRM Dashboard

> Property Listing Platform

> Customer Support Portal

> Restaurant Websites

◆ Includes 1 month free service & maintenance after deployment

TIER 03

Enterprise & Custom Business Systems

End-to-end systems built to run your operations: ERP, POS, payments, real-time tracking, and cloud infrastructure at production scale.

INCLUDES

ERP

Advanced API integrations

E-commerce platforms

POS Systems

M-Pesa (Daraja / PesaPal)

Payment gateways

Notifications (Email/SMS/WhatsApp/Push)

Scheduling systems

Cloud infra (AWS/Azure/Vercel)

Role-based access control

Reporting & analytics

Real-time tracking

Multi-tenant apps

AI-powered features

CI/CD pipelines

SAMPLE PROJECTS

> Logistics & Fleet Management Platform

> ERP for Manufacturing

> Multi-Branch POS System

> Hospital Information Management System

> Warehouse Management System

> Payroll & HR Management System

◆ Includes 2 months free service & maintenance after deployment
